

Online Level 1 Hazard Awareness (ideal for secondary schools)

COURSE DURATION:

2 hours

TARGET AUDIENCE:

- Students embarking on Work Experience
- Young people about to begin employment

AVAILABLE IN:

- Audio (speakers or headphones)

DELIVERED VIA:

- Internet

Endorsed and Audited by Environmental Health Officers.

This online Health & Safety course is aimed at raising awareness at induction level for young people in work experience or young people who are about to begin employment.

The use of audio visual, interactive animation delivers this course in an enjoyable and refreshing format that should fully engage students embarking on work experience.

The Law

Health & Safety law states that employees must be trained and clearly instructed in their duties. This online Level 1 course will give young employees a sound understanding of the health & safety issues where they work and what they can do to maintain a healthy, safe workplace.

Standards

National Standards in Health & Safety have been set, it is essential that staff at all levels have a full understanding of the hazards in their place of work and the dangers involved when ignoring them.

Certificate

On successful completion of the final assessment students can print the certificate directly from their computer.

Modules

The course is broken down into an introduction, three modules and a final assessment. The introduction presents the principles of hazard awareness and course instructions, the remainder of the course expands and reinforces the basics of hazard awareness and health & safety..
